Experience

Software Engineering Intern,   USAA

May 2018 - August 2018

- Worked in a back-end environment to develop an API and implement SOAP to REST conversion in legacy services.

- Improved unit test coverage, participated in innovation projects, created Selenium test scripts, and participated in Agile SCRUM team collaboration.

Software Engineering Intern,   USAA

May 2019 - August 2019

- Worked as a full-stack engineer to develop a web application using a relational database with API integration coupled with an internal facing web application built using ReactJS and Redux framework.

- Participated in innovation challenges and hackathons to modernize internal and external facing systems
